ABOUT

Senior software engineer with 5+ years of experience in designing and scaling robust backend systems. Expert in Spring Boot, Microservices architecture, and RESTful API design, with a proven track record of optimizing database performance using PostgreSQL and Hibernate. Deeply experienced in cloud deployments across AWS and Azure, leveraging CI/CD tools like Harness and message brokers like RabbitMQ to build resilient, distributed applications. Strong advocate for Clean Code, Agile methodologies, and mentoring junior developers to ensure high-quality delivery.

TECHNICAL SKILLS

Java	Spring Boot	Microservices
RESTful APIs	Hibernate	JPA
PostgreSQL	MySQL	RabbitMQ
AWS	Azure	Swagger API
Postman API	Git	Bitbucket
Angular	Agile methodologies	JIRA
Workflow Diagrams	Harness	Cross-functional collaboration

EXPERIENCE

Senior Software Engineer

Nov 2024 – Present

Nitor Infotech Pvt. Ltd. • Pune, MH

- Specializing in Java and Spring Boot, with a proven track record in developing high-performance microservices and RESTful APIs.
- Successfully managed multiple development and update projects simultaneously, ensuring timely delivery and quality.
- Strong leader and team builder, focused on achieving results and fostering collaboration across teams.
- Expertise in creating software solutions tailored to diverse client needs and experimentation platforms.

Software Engineer

Jun 2021 – Aug 2023

Eracal Software Pvt. Ltd. • Pune, MH

- Led the development of scalable web applications using modern frameworks and cloud technologies.
- Designed and developed APIs based on business requirements and integrated them into the application.

- Resolved system issues and improved code quality for better performance and reliability.
- Collaborated with QA and stakeholders to support testing, demos, and ensure high-quality deliverables.
- Coordinated with cross-functional teams and clients across locations to deliver tailored solutions aligned with business objectives.

PROJECTS

Global Data Catalog

An enterprise-grade data management and analytics platform built to manage, catalog, and analyze data while ensuring high standards of quality, accessibility, and global compliance. Contributed to efficiently managing data across global operations, maintaining data quality and accessibility, and ensuring adherence to regulatory compliance requirements.

Stack: Java, Vue.js, PostgreSQL, GCP, AWS.

Accumate

A next-generation accounting solution designed to deliver power and flexibility in company book management, with comprehensive capabilities across accounting, taxation, banking, and compliance. Played a key role in developing a robust accounting platform, implementing tax and compliance functionalities, and integrating diverse reporting tools to streamline financial operations and support informed decision-making.

Stack: Java, AngularJS, Postgres SQL, iReport Designer, and Bhash SMS API.

ULIMI

An advanced smart communication chatbot application designed to enable more effective and intelligent conversations, improve self-service engagement, and automate user interactions. Contributed by developing intelligent assistant features, enhancing self-service capabilities, and automating user interactions to deliver a seamless and efficient user experience.

Stack: Java Spring Boot, Postgres SQL, Swagger, and Dialog flow.

Click 360

An application designed to track and manage employee performance within an organization, featuring modules for goals, competencies, and incident management. Contributed by developing performance tracking modules, monitoring employee goals and competencies, and automating incident reporting to enhance workforce evaluation and operational efficiency.

Stack: Java Spring Boot, MySQL, Swagger, Eureka Server.

Invoice Management System

A microservices-based application built as a rapidly deployable and cost-effective SaaS solution for intelligent invoice management. The system processes incoming emails containing invoice PDFs, automatically extracts relevant data using intelligent IMA capabilities, performs completion checks to ensure data accuracy, and applies multiple business rules for validation. Contributed by implementing the microservices architecture for invoice processing, automating email data extraction and business rule execution, and managing the rapid deployment of the SaaS model.

Stack: Java Spring Boot, SQL Server, Swagger, Eureka Server, Activiti workflow, RabbitMQ, Azure form recognizer.

EDUCATION

Pune University • Pune, MH

Diploma in Computers Technology

2013

Maharashtra State Board of Technical Education • Pune, MH

Higher Secondary Certificate (Science)

2010

Maharashtra State Board of Technical Education • Pune, MH

Secondary School Certificate

2008

Maharashtra State Board • Pune, MH
